Portfolio | LinkedIn | GitHub

Rancho Palos Verdes, CA

Professional Summary Systems Engineer & Data Scientist specializing in technical architecture, production-ready data systems, and self-healing monitoring layers for complex registries and mission-critical data streams.

Education & Honors

BS Data Science | Bellevue University | Expected March 2026 (GPA: 3.68)
BS Business Analytics | Bellevue University | Expected Fall 2026
Honors: Omega Nu Lambda (Academic Excellence); President's & Dean's List.

Technical Skills

AI & Machine Learning: RAG Pipelines, Anomaly Detection, LSTM/RNN, Random Forest, SMOTE.
Engineering & UI: Python, SQL (PostgreSQL, 3NF), TypeScript, Streamlit, Next.js, Docker, Git.
Data Governance: C2PA Provenance, Data Integrity Standards, Forensic Auditing, HIPAA-Compliant Systems.

Technical Projects **Geospatial Sentinel Dashboard:** Built a monitoring system to remediate fragmented data, map socio-economic trends, and maintain full pipeline uptime.
VICEVERSA Archival Registry: Architected a hardware-to-blockchain archival verification system using C2PA and designed a high-contrast stakeholder UI.
Engineering Signal Extractor: Built a Python utility to extract ISO/ASTM standards from complex PDFs with high precision.

Professional Experience

**Technical Lead & Systems
Consultant**

Freelance
2022–Present

Architected end-to-end data registry and automated monitoring solutions for independent clients.

**Data Integrity & Operations
Specialist**

Healthcare/Service Context
2013–2025

Systems Integration: Managed high-volume EMR/EHR data flows and resolved interface failures.
Operations Leadership: Optimized workflows through predictive analysis and resource coordination.
Compliance & Auditing: Maintained 100% data integrity for life-sensitive metrics and documentation.
Data Standardization: Standardized multi-source inputs to improve reporting accuracy across teams.
